

VariWORK table type CLASSIC with two shelves on the construction and small superstructure with modules

The Work tables VariWORK CLASSIC are primarily designed for furnishing of production or repair facilities.

The basic characteristic feature of the VariWORK table is the free work space of the table, placed on a sufficiently robust, stable construction. Tables are designed as stand-alone tables. The basic set consists of a height-adjustable metal base that carries a tabletop and in a shelf suspension structure can be attached to the back part of it. The metal structure is provided with the powdered baked-on colour Comaxit and galvanized zinc. The worktop of the table is made of the resistant HPL or an antistatic 25 mm thick laminate with resistant edges. The edges are made of 2 mm thick ABS plastic and they are glued with a polyurethane adhesive. The sizes of the worktop are given by a specific set in the widths of 1200, 1500, 1600, 1800 and 2000 mm, depth 800 mm.

VariWORK CLASSIC tables can be equipped with additional shelves, tool holders, boxes for small material, hooks for electrical mounting tools and a lamp.

VariWORK Classic tables can be supplemented with an AI profile aesthetic rail with a simple system of 230V AC electric sockets or with a device superstructure (table top only).

VariWORK CLASSIC tables are characterized by an easy robust construction. Of course there are also some rectifying screws to adjust the table to the same level. These tables are not designed for mounting of hanging device superstructures, but are suitable for assembly of smaller device superstructure with some selected VariLAB + modules. In this case, the module is always included with the main circuit breaker, current circuit breaker, TOTAL STOP button and light indicators. In addition, the drawer containers will resolve the need of storage space.

Main features:

- Light construction
- Modern ergonomic design
- Optional antistatic version
- Height-adjustable work area
- Solid and stable shelves
- Spacious work area
- Simple power supply
- It is possible to use the device superstructure
- Durable and high quality materials
- Simple assembly
- Standard table width:
- 1200, 1400, 1600, 1800, 2000 mm
- Table top height 740 mm - 1040 mm
- Height of shelf rails 475 and 875 mm
- Powerful, adjustable LED light

VariWORK table type CLASSIC simple construction without shelves and other components like superstructure

VariWORK table type CLASSIC Detail of the power bar design with the circuit breaker, 230V sockets and light switch.

Beneath the shelf we can see a powerful LED light (2500 lx).

The light can be adjusted to the desired angle by rotating around the horizontal axis.

The light is equipped with an electronic dimmer with a sensor control.
