1. General description

Zinc, aluminum, anti corrosion additives and a durable resin provide optimal corrosion protection. The weathering aspect equals hot dip galvanization, making it an excellent touch up for damaged galvanization.

2. Features

- Excellent touch-up for galvanised surfaces.
- Long term corrosion protection.
- Totally free of lead and chromates.
- None chlorinated solvents.
- Unique combination of flexibility and hardness providing an excellent adherence to the metal surface.

3. Applications

- Cleaning mechanical parts.
- Handling equipment.
- Chains.
- Railroad equipment.
- Agricultural equipment.
- Long term outdoor corrosion protection.
- Corrosion protection of all ferrous materials.
- Touch-up of galvanised equipment after repair.
- Touch-up of parts after hot dip galvanising.
• Pylons (telecom, power transfer,...)
• Silencers on combustion engines.

### 4. Directions

- Shake well before use.
- Shake until the agitator ball moves freely in the can.
- Apply to a clean, dry surface.
- Apply a thin even film.
- Best results are obtained with 2 lighter rather than 1 heavy coat. Additional coats can be applied after 15 - 20 minutes.
- Do not use on energized equipment.
- Do not use on sensitive electronic equipment.
- Clean the aerosol valve by turning the can upside down and spraying until only propellant escapes.
- **A safety data sheet (MSDS) according to EC Regulation N° 1907/2006 Art.31 and amendments is available for all CRC products.**

### 5. Typical product data (without propellant)
