

Date: August 8th, 2019

Subject: Product change notification

Dear Customer,

4D Systems is making some changes to the individual parts included in some of its Intelligent Display Module Starter Kits.

The uUSB-PA5-II will be included in all uLCD branded starter kits instead of the 4D-UPA. This does not affect the functionality of the starter kits.

During this transition it is possible that you will receive a starter kit that either includes a 4D-UPA or a uUSB-PA5-II programming adaptor in the kit. Both programming adaptors provide the same functionality and do not affect the way that you work with the display module during your development.

The enclosed table outlines the affected products and milestone dates.

We are consistently dedicated to providing our customers with excellent products and services. If you have any questions, please contact your 4D Systems Account Manager.

Please feel free to contact us if you have any questions or concerns regarding this announcement.

Sincerely,

Markku Riihonen
Global Products and Business Development Manager
4D Systems

New Part Numbers: Part Numbers will remain identical

Description of Change: All Starter Kits for uLCD products (non gen4 starter kits) will contain one piece of uUSB-PA5-II programming adaptor instead of one piece of the 4D-UPA and 150mm 30-way FFC Cable.

Impacts to Data Sheet: Content changes to section: "Hardware Tools"

Other Documents Affected: None

Reason for Change: Simplification of workflow with uLCD Starter Kits

Estimated First Ship Date: 7 August 2019
