Announcement of KE-25 Country of Origin Change

Dear Figaro Customers:

We would like to take this opportunity to inform you of a change in the country of origin for GS-Yuasa's oxygen sensor KE-25. This change has been made in order to expand production capacity:

Current: Made in Japan

New: Made in Japan + Made in Vietnam

The country of origin is shown on the side of the sensor body.

Please note that oxygen sensors may be shipped with a mixture of "Made in Japan" and "Made in Vietnam" in one shipment since oxygen sensors are shipped on a first-in first-out basis due to the item's limited shelf life.

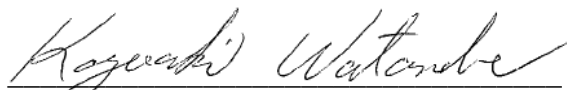

There is no difference in sensor quality between the different countries of origin. The price remains the same.

The expected time for implementation of this change will be around January of 2014.

GS-Yuasa is eventually planning to manufacture other oxygen models in Vietnam. We will inform you when a concrete schedule materializes.

Should you have any questions, please do not hesitate to contact us.
