USR-K Series New version

Dear customer,

To enlarge the production capacity, we developed another factory to produce USR-K5, K6, K7.

New factory has different production process. So the network transformer is changed. This component don't have influence on the usage of module. New model has a label on the shell, old module don't have the label.

Now we have three versions USR-K6.

1. The old USR-K6

2. USR-K6 (A4).   -------The only difference is data bit. Original K6 data bit is 7, 8.   A4 version only support data bit 8.

3. USR-K6 (A4) new. ------have a label on the shell.

Two versions USR-K7. Main difference is label.

Two versions USR-K5. Main difference is label.

Each edition is shipped randomly. Hereby certify. If you have any doubts or question, please contact us freely!

Thank you!

USR IOT Team.
