NEW 7T.81.0.000.240x

• Heating control

NEW 7T.81.0.000.230x

• Ventilation control

Heating control - Should the panel temperature fall below the (minimum) set temperature the contact will close to call for heat. The contact will open when this set temperature is exceeded.

Ventilation control - Should the panel temperature exceed the (maximum) set temperature then the contact will close to call for cooling.

The contact will open when the temperature falls below this set temperature.
